Seamless Gate®
The contactless biometric solution for self-service boarding and security checks.

The Seamless Gate® offers the best contactless face biometrics passenger identification.

This self-service solution enables travellers to enjoy a seamless identification experience, without having to show their travel documents or boarding pass at any point of the airport journey. Whether at the security checkpoint, boarding or even accessing the lounge, the highest levels of security are non-intrusively met, simply by walking through.

Main features:

- High-quality biometric identification
- Intelligent light compensations
- Anti-spoofing detection
- Compact footprint
- Barcode reader
- 360º Status LED visibility
- AEA/ITPS ready

Seamless

Devised for a truly seamless airport journey, the Seamless Gate® offers a smooth and continuously integrated traveller-centric flow, combining data from different systems for the highest level of security, and a modern experience for travellers, supported by Vision-Box Seamless Journey Platform®, the powerful IoT common-use passenger flow management platform.

Avatar-based technology that interacts with the passenger

The Seamless Gate® incorporates the possibility of having an avatar that interacts with passengers and mimics their movements, which can be customised for each customer's needs. Studies have proved that creating an emotional link with the traveller by leveraging AI-based technology can substantially relieve stress levels and largely improve natural collaboration to deliver the best possible data quality.

Streamlined

This unique traveller interaction solution enables a streamlined, one-solution approach to all touchpoints. The Seamless Gate® technology is available to process all travellers, adapting itself to each passenger's unique behaviour and features, automatically activating alternative identification methods if needed.

Contactless security

Designed and engineered to quickly identify eligible people for passage while maintaining and exceeding all international security standards, the Seamless Gate® is ready to process people in an integrated end-to-end biometric-based process. It provides travellers with a walkthrough identification experience, eliminating direct interaction with officers. High accuracy identification and eligibility are secured in a few seconds.
